Random Number Generator Certificate

Software Provider: Skill On Net Ltd
Software Provider URL: www.skillonnet.com

This is to certify that iTech Labs has evaluated the Random Number Generator (RNG) used by Skill On Net Ltd and found that the RNG complies with the relevant standards.*

The RNG uses a well known algorithm to generate random numbers. The numbers generated by this RNG have passed Marsaglia's "diehard" tests for statistical randomness.

iTech Labs has evaluated card shuffling for single deck (without joker and with 1 joker), 6 decks and 8 decks of cards. iTech Labs has also evaluated scaling for slots, dice and roulette games. The shuffling and scaling tests were conducted on large enough samples to give the calculations sufficient statistical power.

iTech Labs has found that the card/number sequences are unpredictable, non-repeatable and uniformly distributed.

The certified code for the RNG has been fingerprinted.

   * The RNG was tested according to UK Gambling Commission standards - Remote gambling and software technical standards April 2015.

Disclaimer.
While it is not possible to test all possible scenarios in a laboratory environment, iTech Labs has conducted a level of testing appropriate for a component test of this type.
